

Job Opening

Bibliometric and Scientometric Specialist

HCERES (French High Council for the Evaluation of Research and Higher Education) is an independent administrative authority that:

- Evaluates universities, research organisations and the National Research Agency; higher education programmes and institutions;
- Contributes to the policy evaluation in the field of research and innovation policies;
- Contributes to the evaluation of foreign research and higher education institutions.

OST (Science and Technology Observatory) is one of HCERES departments. A major producer of bibliometric analyses in France, OST designs and produces indicators and studies on research and innovation. It contributes to HCERES missions, and more broadly to the analysis of research and innovation systems.

Responsibilities

The bibliometric/scientometric specialist will be part of OST team that focuses on bibliometric and statistical methods.

He/She will be in charge of supervising OST's scientometric methods, both in relation to its historical data bases (WoS, PATSTAT) and to explore new data sources. Besides, he/she will conduct specific projects.

Knowledge, Skills and Abilities

Essential

- Advanced graduate degree
- Excellent skills in data analysis, data management, statistical or mathematical modelling, and bibliometric analysis
- Experience in bibliometrics and science policy
- Knowledge of French and English
- Excellent interpersonal communication and presentation skills
- Strong knowledge of PC based computer applications including Microsoft suite

Desirable

- Competent in using data management software/systems
- Ability to cultivate collaborative research relationships
